

**Definition of specialty medications:** Specialty medications are generally prescribed for people with complex or ongoing medical conditions such as multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis. These high-cost medications also have one or more of the following characteristics: injected or infused, but some may be taken by mouth; unique storage or shipment requirements; additional education and support required from a healthcare professional; and usually not stocked at retail pharmacies.

**FOR PEEHIP Members Only:** Coverage excludes the provider-administered medications outlined in this drug policy from being accessed through a specialty pharmacy. It must be obtained through buy and bill. Lemtrada, Synagis, and Spravato are exceptions to this policy. Lemtrada will require the use of a specialty pharmacy. Synagis and Spravato may be obtained through buy and bill or specialty pharmacy.

**Note:** In order for a member to receive in-network benefits for the following specialty drugs, the specialty pharmacy filing the claim must contract with the Blue Cross and Blue Shield Plan where the provider is located. The in-network specialty pharmacies are Accredo Health Group, Inc. (1-888-608-9010) and CVS/Caremark (1-800-237-2767). However, please check member benefits for a complete list of in-network pharmacies available.
